

■ 【Service Planning】 Background

	As-Is	To-Be
Image		
Remarks	Current Challenges • Spot resources • Non-covered area • Non-accumulated knowledge • Non-governance Infra architecture for Applications	How to support App-driven PJ ★ 1 Clarify the app-driven project which needs Infra support → Secure the budget and resources for Infra in app-driven project ★ 2 Infra Service Request (ISR) → Assign the necessary Infra SA to app-driven project ★ 3 Infra Architecture Review → Clear Infra-related issues at requirements definition phase.

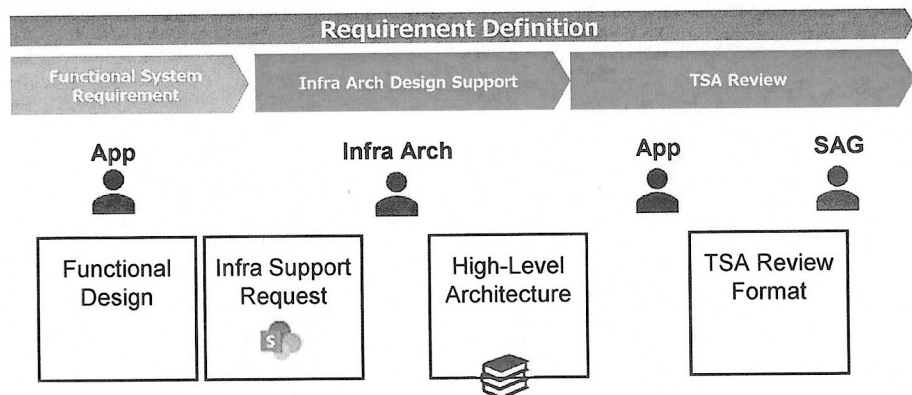

■ 【Service Planning】 Infra Solution Architect

- An architect with in-depth knowledge of the APAC infrastructure will design a high-level architecture. This will contribute to subsequent processes such as the TSA review.
 - We secure estimated infrastructure costs even in application projects to prevent mid-term adjustments and facilitate project management.
 - Even in application-driven projects, we will grasp the infrastructure demand and secure ample resources in advance.
 - Global BizTech Sharing APAC representation.
-
- We will make previously undisclosed information and infrastructure system overviews open to promote better understanding of the infrastructure.

■ 【Service Planning】 Infra Arch Design Support

(1) Overview

(2) Advantages

Infra Side	App Side
1. A precise system architecture is identified at an early stage, which improves the accuracy of subsequent planning. 2. Estimate Infra demands in advance	1. A precise system architecture is identified at an early stage, which improves the accuracy of subsequent planning. 2. Estimate Infra demands in advance

■ 【Service Planning】 Infra Arch Design Support

START

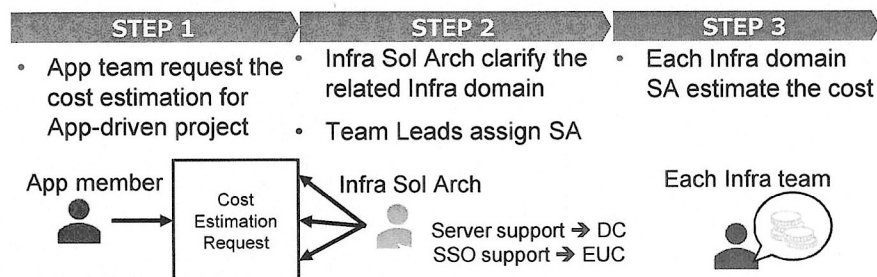

【Service Planning】 Infra Support Cost Estimation

object	Infra Support	Infra				Cost of Infra Support
		DC	NW	EUC	MW	
project	×	-	-	-	-	\$ 0
project	○	○	×	×	×	\$ XX
project	○	×	○	○	×	\$ YY

①

②

③

(2) Advantages

1. It will eliminate the need to adjust additional budgets during the fiscal period.

1. We can secure infrastructure personnel in advance and prevent project delays caused by resource shortages.

(3) Schedules

	FY2025	FY2026			
	4Q	1Q	2Q	3Q	4Q
	Initiation	Planning	Execution	Implementation	
Support Execution	#1	#2	#3	▽ IT Demand Exercise ▽ #6	#7
			#4	Review	
			#5		

To-Do List

#	Phase	Activity
1	Planning	Create service scheme
2	Planning	Aligned with IPG
3	Execution	Update the excel file for IT Demand Exercise
4	Execution	Create the service catalog for Infra regular tasks
5	Execution	Create the platform to manage the estimation for each Infra team, and Announce the rules within Infra
6	Execution (w/ IPG)	Announce the rule of registration for Infra demands
7	Implementation	Support for distributing the estimation for each Infra team

■ 【Service Planning】 Infra Resource Allocation
